

On Girls Hair: I only know enough to give a VERY BASIC trim, so kids don't look like hooligan children. Part the girl's hair in the place that you are going to part your child's hair for every day hair styles, or just comb in the natural direction of the hair from the crown, if your child does not have a natural part. Wet the whole hair, and then follow the procedure for cutting bangs to give your little girl a trim. Leave out the last step for the long portion of the hair.

Disclaimer: This whole class was put together only from my experience, a little mom, and a little online study over a period of a few years. My knowledge was completely borne of necessity to save money when my husband and I were newly married. I have never been to hair school. Happy learning. ☺
